

Notice of future meetings

CES 9: Cardiovascular system
Tuesday 18th - Thursday 20th July 2017
Cambridge

Registration for this symposium is now open!

This symposium will provide an in-depth coverage of cardiovascular system pathology. This is an intermediate level symposium covering INHAND nomenclature for the cardiovascular system; evaluation of the cardiovascular system and species variation; drug induced vasculitis; cardiovascular pathobiology and possible mechanisms; safety pharmacology, biomarkers, clinical pathology and haematological evaluation of the cardiovascular. There will also be workshops/case presentations on cardiovascular system problems which will form an important part of the symposium.

This symposium is **the** event for toxicological and discovery pathologists (and other scientists working with animal models), clinical pathologists and toxicologists as well as non-clinical regulatory scientists to learn about recent scientific advances. As well as providing CPD for experienced members of the profession, the symposium is open to students/residents and those at the start of their pathology career.
